

www.AffordableDrugs.com

Affordable Drugs is a Canadian pharmacy with an A+ rating from the BBB since 2002. ("I buy my own prescriptions from them." - Greg Howard - KCJA board member.)

So why buy from Canada?

- 1.) Brand name drugs are 50% to 75% cheaper. Canadian law prohibits drug manufacturers from recouping their development costs in the pricing of the drug.
- 2.) Canada gets generics before we do. There is substantial difference in the patent expiration laws. Always consult your physician before changing to a generic.
- 3.) As with everything else, if you buy larger quantities of anything, the cost per item goes down. The same is true of medications. On prescriptions you know you are going to need, you can buy up to a year's supply.

Is it safe?

The majority of our prescriptions in the US come in from overseas. India, Turkey, United Kingdom, and Canada are all reliable sources of prescriptions bought through a reliable pharmacy.

How do I order?

The easiest way is to call their 800 number, read the information on the bottle you have or tell them what you need and give them your doctor's phone number. They will call your doctor, get the prescription information they need and send your prescription to you through the mail. Allow 21 days for delivery.
